

Work Sample Title: DECA Franchise Business Plan

Date of Project/Activity: 5/1/24

***Skills Demonstrated:** Innovative Thinking, Financial Planning, Communication

***[Standard\(s\) for Career Ready Practice \(SCRP\):](#)**

Summary of the activity: *(provide a brief summary of the project/activity and write it as though the reader knows nothing about it)*

Created and pitched a 20 page Franchising plan to an industry professional for a high profile Gym called Equinox in India. India has one of the most growing millionaires in the world and implementing an exclusive but expensive gym was the general idea behind our pitch.

Execution of the activity: *(explain the steps taken to complete the project/activity; discuss the skills utilized in executing & managing the project)*

We began our project by developing and planning out several goals that my partners and I wished to accomplish. Then we researched the business to learn the ins and outs of what makes Equinox a great business. We learned their story and what makes them special. Then we took that and expanded on it by providing potential areas for growth including expansion into places such as India. We then converted our ideas onto a graphically pleasing canva presentation and traveled to a conference to present our pitch to industry professionals. They provided important feedback that me and my partners wish to improve upon if given the chance.

Evaluation of the activity: *(evaluate the project/activity highlighting what worked well, what didn't go as planned and what you learned from it)*

The project went well, though the industry professional did give my group feedback that we needed to clarify some weaknesses in our business plan if we were ever looking for a real investor. Overall this pitch helped me learn the ins and outs of business and progressed my understanding of how to pitch ideas to investors.
